

Important Information for Adult Patients Seeking ADHD Referrals

- If you are being referred for ADHD through the **Right to Choose** pathway, you **do not need an appointment** with a clinician.
- You will still need to **complete the necessary forms** and **send them to us**. Once received, our secretarial team can process your referral directly.
- However, if you are being referred through the NHS via a **Mental Health Practitioner**, you **will still need an appointment**.

Useful websites are the NHS website and <https://adhduk.co.uk › right-to-choose>

If you're unsure which pathway applies to you, please contact the practice for guidance.
